# To Our Customers

- Visitors: We are always glad to welcome visitors to our Nurseries, and while at certain seasons—notably May and June—we can show a fine display of bloom, we feel that there is always something of interest to be found here throughout the year.
- LOCATION: The Nurseries are located a quarter of a mile below Media Railroad Station (Pennsylvania Railroad), on the Ridley Creek Road. Follow South Orange Street (it passes the railroad station) to its end in the Creek Road and turn to the left. Our entrance is the first on the right. The map on the back of this catalog will help you to find the way.
- ROCK PLANTS: The popularity of rock gardening has prompted us to offer three standard collections of rock plants, at varying prices, for those beginners who may find it difficult to make their selections from the wealth of Alpine and herbaceous plants at their disposal. These collections are grouped at the back of the catalog on the inside cover page.

Aside from the plants listed therein we have also placed an asterisk (\*) in front of the names of all plants listed in our catalog that are suitable for rock gardens.

- Prices: A casual glance at our prices may momentarily convey the impression that we are expensive, but on closer examination, you will note that our prices for three or ten of a kind are generally on a par with the prices of other reputable growers. The unit price has been slightly increased and our reasons for the advance in the price of single plants are (1) It takes time and labor to label, assemble and pack orders for single plants, a process that eats up our moderate profits. (2) One plant of a kind will seldom make an impressive showing in the garden. (3) Three plants of one kind will give quicker massed results and will offset the bareness of an odd failure here and there.
- Errors: We try to furnish all plants true to name, but as in the digging, packing and shipping of hundreds of plants, mistakes will sometimes occur, we cannot give any absolute guarantee. We are always glad, however, to correct any errors made by us, provided that we are informed of them at the time that the plants are received.
- Unlisted Varieties: We are continually adding to the number of varieties of plants we grow, and while often our supply of these new plants is too small to warrant cataloguing, we are always glad to furnish them to the seeker after the rare and unusual, who either writes to us or calls at our Nurseries.
- Landscape Work: In addition to our regular nursery business, we are glad to offer to our customers a complete landscape service, covering the planning and development of gardens, either large or small, and estates of all sizes, as well as the planting, labor and supervision of such work, at reasonable prices.

F. R. Furness, Proprietor.

Cool citron yellow  dumortieri. Orange yellow. 2 ft. May-June  flava. Pale yellow and fragrant. 2-3 ft. June-July  Florham. Exquisite pure yellow. June-July  fulva. A tawny cinnamon orange. 2-3 ft. July-August  fulva, Kwanso florepleno. Large, double flowers of a rich, bronze	.30 .30 .30 .30 .30 .30	.85 .85 .85 .85 .85	2.50 2.50 2.50 2.50 2.50 2.50 2.50
orange. 2-3 ft. June-August	.30 .30	.85 $.85$	$\frac{2.50}{2.50}$
h. Sovereign. Pretty, dark orange flowers. Very early blooming variety. 2-3 ft. June-July	.30	.85	2.50
2-3 ft. June-Julyochroleuca. Blooms are a soft chrome yellow. 2½ ft. June-July	.30 .30	.85 .85	$\frac{2.50}{2.50}$
thunbergi. Flowers lemon yellow, very fragrant. One of the most desirable species	.30	.85	2,50

	Ea <b>c</b> h	3	10
matronalis. Dames Rocket. Fragrant, pale, pinkish lavender flowers in loose clusters. Desirable for the wild garden or for shrubbery. 1½-2 ft. June-July		\$0.75	\$2.00
<b>HEUCHERA.</b> Rich soil in sun.			
*sanguinea. Coralbells. A splendid rock plant. Rosettes of leaves			
from which rise clusters of slender, foot-high stems bearing showers			
of tiny coral bells that float like a pink mist over the evergreen foliage. June-September	40	1.00	3.00
HIBISCUS. Moist rich soil in sun.	.10	1.00	3.00
hybrids. Great mallows ranging from carmine to peach pink and			
white. A swamp plant, but grows well in good garden soil. 3-4 ft.			
August-September		1.50	4.50
HIERACIUM. Ordinary soil in sun.			
*aurantiacum. Little flowers 6 in. high, like miniature paint brushes			
dipped in burnt orange. Spreading, but easily controlled where			
the Summers are hot and dry. June-July	.30	.75	2.00
HYSSOPUS. Ordinary soil in sun.			
officinalis. The Hyssop of The Psalms. Spikes of violet blue, pale			
pink and white flowers in June. 2 ft	.35	.85	2.50
IBERIS. Well drained soil in sun.			
*sempervirens. Compact evergreen foliage which, in June, is hidden	0.0		0.00
under a foam of milk white flowers. 1 ft	.30	.75	2.00
INULA. Well drained soil in sun.			
<b>helenium.</b> A robust but handsome plant with large flowers which resemble orange rudbeckias. 5-6 ft. July		.85	2 50
semble trange rudbecklas. 5-01t. July	.50	.60	4.50

IBERIS SEMPERVIRENS

# Iris

We offer a very complete and choice collection of these charming flowers. They will give the maximum of satisfaction for a minimum of care and attention. They thrive in ordinary garden soil in sun, and require only a yearly top dressing of well rotted fertilizer for best results.

versicolor. A native of the Eastern United States. Pale blue purple, veined darker. Good for planting at waterside	.35	.75	2.50
wilsoni. A pale yellow Iris much like a yellow Iris sibirica	1.50	4.00	10.00
<b>DWARF.</b> Dwarf, tufty Irises very desirable for use in the rock garden or as borders for the taller growing kinds.			
*pumila alba, The Bride. A very early pure white Iris. Small and	.25	.60	1.50
*p. cyanea. An early blooming dwarf with clear, rich purple flowers *p. Excelsa. Clear yellow with an orange beard. Fine, large flowers.	.25	.60	1.50
Early blooming	.35	.75	2.50
Nankeen yellow. Choice	.25	.60	1.50
*p. Orange Queen. Deeper in shade than Iris p. lutea but equally fine.	.35	.85	2.50
*p. Schneekuppe. Little white pumila. The best white but not the earliest	.35	.85	2.50

IRIS GRACILIPES. (See page 25).

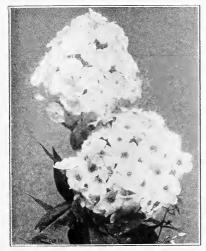

IRIS—Continued	Each	3	10
KAEMPFERI. Japanese Iris. Salver shaped blossoms with drooping			
petals held high above the foliage. In color they range from ivory			
white through pale grays, doves, slate blues, pinks and wine reds to			
deepest purples. These Irises thrive best in a rich, deep, moist soil			
with an abundance of water prior to and during the blooming period in July. 3-4 ft	RO 75	\$2.00	\$6.00
	ф <b>0.10</b>	Ψ2.00	ψ0.00
SIBIRICA. These Irises are highly valued for their later blooming			
qualities for they bloom during June and July. Slender foliage and			
free blooming habit make them very desirable for mass plantings.			
Butterfly. An uncommonly beautiful Iris of clear porcelain blue. A delicate and charming color	1.00	2.50	7.50
Corea. A lovely, pale periwinkle blue. Very beautiful	.75	2.00	6.00
Emperor. A tall variety with very rich, deep purple blooms			15.00
Grandis. A deep toned Iris, violet, veined white	.25	.85	2.50
Lactea. Chaste, milk white. A very attractive color.	.35	.85	2.50
Lady Northcliffe. An improved Orientalis with large, violet blue	.55	.00	2.00
flowers and broader foliage	.75	2.00	6.00
<b>Perry Blue.</b> One of the truest blues of all the Irises. Very fine			10.00
Snow Queen. Magnificent, tall white with yellow hafts	.35		2.50
Sunnybrook. A superb, large, pale grayish blue. A truly gorgeous		.00	
flower		2.50	7.50
True Blue. A select form of Orientalis. A splendid, delicate blue	1.50	4.00	10.00
SPECIES			
*cristata. A dwarf native. Very low and spreading, with clear, pale blue flowers. One of the choicest for the rock garden. Requires			
woods soil and semi-shade	.50	1.25	4.00
forresti. A tall, delicate yellow Iris that looks well in front of blue			
Siberian Iris	1.50	4.00	10.00
*gracilipes. Like a tiny Japanese Iris. Lavender, orchid like flowers.  A rare Iris that prefers a sheltered spot in moist semi-shade	1 50	4.00	10.00
A rare institut prefers a sheltered spot in moist seim-shade	1.50	4.00	10.00
LATHYRUS. Ordinary soil in sun.			
latifolious. Everlasting Pea. A vigorous climber suitable for growing			
on a trellis or tree stump. Clusters of sweet pea like flowers of a deep			
clover pink. July-September	.35	.85	2.50
l. alba. A white variety of the preceding. June-September	.35	.85	2.50
LEPACHYS. Ordinary soil in sun.			
pinnata. A Western variety of the Black-eyed Susan. A graceful pla	nt		
with large, primrose flowers, the long twisted petals of which a pendant from a black central cone. 4-5 ft. Midsummer	re		
pendant from a black central cone. 4-5 ft. Midsummer	.40	1.00	3.00
LIATRIS. Ordinary soil in sun.			
spicata. Kansas Gayfeather. Slender spikes densely crowded with		~~	
tufts of rosy purple flowers. 2-3 ft. July-September	.35	.85	<b>2.</b> 50
LINUM. Rich, moist soil in sun.			
perenne. Blue Flax. Feathery, blue green foliage and masses of deep,			
sky blue flowers. One of the finest blue effects in the garden. 2 ft.  June-July	.30	75	2.00
June-jury	.50	.10	2.00

LOBELIA. Rich, moist soil in sun or semi-shade.  cardinalis. Spikes 5 to 6 ft. high, glowing with intense cardinal red.	Each	3	10
Combined with aster novae-angliae, it makes a bold and gorgeous late Summer effect. September	\$0.50	\$1.20	\$3.50
<b>c. siphilitica.</b> A soft lavender blue variety of the preceding. Very late blooming and lovely for naturalizing. 2 ft. September-October.		.85	2.50
LUPINUS. Rich soil in sun.  polyphyllus. Long spikes of pea-shaped flowers in pinks, blues and whites. 2-3 ft. June-September	.40	1.00	3.00
LYCHNIS. Ordinary soil in sun. *alpina. An attractive Alpine plant with tufted foliage and low clusters			
of deep rose flowers. 4 in. April-May	.50	1.20	3.50
scarlet flowers. A staccato note to waken up a blue border. 2-3 ft. June-July	.30	.75	2.00
c. salmonea. Like the preceding, but with flowers of an exquisite, luminous salmon pink. Stock limited	.50	<b>.</b>	
haageana. A low growing variety of the former. The colors range from a pale creamy pink to a rich jasper red. The flowers are very large and the plants have a trailing habit	.40	1.00	3.00
LYSIMACHIA. Rich, moist soil in sun.			
ciliata. Fringed Loosestrife. Frilled daisylike flowers of a soft old gold, with dark, bronzy foliage. 2 ft. July-August	.30	.75	2.00
with long tassels of pure white, like bent fingers. 2 ft. July-September.	.30	.75	2.00
punctata. Brilliant yellow, starlike flowers in the axils of the leaves. Forms a fine close border or little hedge, 3 ft. high, the brilliant gold flowers making a very showy effect. June	.30	.75	2.00
LYTHRUM. Bog or marshy ground in sun.			
salicaria roseum, Rose Queen. A remarkably free blooming variety, with long, graceful spikes of rosy pink flowers. For the bog garden, or for naturalizing in drifts along a stream bank, there is nothing to equal it. 2-3 ft. July-September	.35	.85	2.50
MALVA. Rich, moist soil in sun.			
alcea. Hollyhock Mallow. Round, much divided leaves and numerous flowers like small Hollyhocks of a brilliant watermelon pink. 1-2 ft. July-August	.40	1.00	3.00
moschata. Musk Mallow. Great funnels of shell pink, white and carmine on 4 to 5 ft. stalks. A magnificent display in August and September	.65	1.50	4.50
MATRICARIA. Ordinary soil in sun.			
<b>inodora.</b> Feverfew. Great clusters of white lace buttons borne profusely throughout the Summer. Excellent for cutting. 2 ft	.30	.75	2.00
MAZUS. Well drained soil in sun or semi-shade.			
*rugosus. Turflike mats of pale green, studded with tiny amethyst snapdragons. 2 in. June-July	.30	.75	2.00

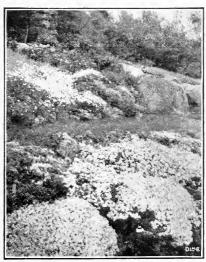

MELICA. Ordinary soil in sun. altissima. A very beautiful, silvery white, ornamental grass. 1-2 ft	Each \$0.35	3 <b>\$0.</b> 85	$10 \\ $2.50$
MELISSA. Ordinary soil in sun.  officinalis. Lemon-scented Balm. An old-fashioned sweet herb with the scent of lemon-verbena. Excellent in finger bowls. 1-2 ft. June-August		.85	2.50
MENTHA. Moist soil in sun.  piperita. Peppermint. A well known, useful herb for flavoring sauces and drinks		.65	1.50
MEUM. Ordinary soil in sun.  anthemanticum. Very beautiful foliage, like frilled, crimpled, deep green lace. The flowers form clusters of aromatic gold buttons. 3 ft. July-August	.30	.75	2.00
MONARDA. Moist soil in sun.			
didyma. Bergamot. Scarlet cockades. A beautiful lambent note in a woods planting. Fragrant foliage and flowers. 1½-2½ ft. June-September	.30	.75	2.00
of soft salmon pink. It likes a moist situation and is a beautiful massing plant. 1½-2½ ft. July-August	.40	1.00	3.00
combined with layender Funkias, 1½-2½ ft		1.00	3.00
fistulosa. Wildbergamot. A pretty plant, producing fine lavender flowers. It will grow well in dry places. 2-3 ft. July-August		.75	2.00
<ul> <li>MYOSOTIS. Moist soil and semi-shade.</li> <li>*palustris. The well known, pale sky blue Forget-me-not. Loves rich, moist soil and the banks of streams, where it naturalizes easily. 6 in. May-June.</li> </ul>	.30	.75	2.00
*mussini. Aromatic, sage green foliage with foamy masses of small lavender flowers in June. Invaluable for the rock garden or border edging. 1 ft	.40	1.00	3.00
OENOTHERA. Ordinary soil in sun.			
fruticosa. Masses of sulphur yellow flowers in June. A profusely blooming plant which is also attractive during the Winter on account of its flat rosettes of bronze leaves. 1½ ft		.85	2.50
*missouriensis. A trailing variety that holds up to the sun great pleated cups of citron yellow. Beautiful combined with nepeta on dry, sunny banks. June-July		1.20	3.50
<b>OPUNTIA.</b> Dry, sandy soil in sun.			
*vulgaris. A hardy Cactus with succulent, spine studded foliage. Crisp, yellow flowers which are followed by edible red fruits. Useful and interesting in the rock garden or in dry, parched locations		.75	2.00
PACHYSANDRA (See Hardy Shrubs and Vines, page 47).			

PAPAVER. Rich light soil in sun. *altaiaca. A delicate apricot orange Poppy blooming all Summer.		3	10
Increases rapidly and soon establishes itself in the garden. 1 ft. high and of very delicate growth	§0 <b>.</b> 35	\$0.85	\$2.50
glowing flames. Particularly beautiful planted by themselves in front of evergreens. 4 ft. June	.65	1.50	4.50
o. Mrs. Perry. An exquisite variety of the preceding. Very large flowers of a soft flamingo pink with splashes of black at the base of the petals. Beautiful in the border	1.00	2.50	7.50
o. Perry's White. A new and most distinctive introduction. Large, goblet shaped flowers of satiny white with contrasting maroon base. A rare and superb Poppy		3.50	10.00
PARDANTHUS. Well drained, light soil in sun.			
chinensis. Chinese Blackberry lily. Orange stars, flecked with black, on 3 ft. stems, and pale, gray green, irislike foliage. Followed later by seed pods, like great blackberries. July-August		.85	2.50
PENTSTEMON. Rich, well drained soil in sun.			
barbatus torreyi. Tall wands hung with drooping, tubular, coral flowers. A very graceful and beautiful perennial. 3-4 ft. June-July.	.35	.85	2.50
glaber. A charming native with trumpets of violet purple set off by pretty, bluish green foliage. 1-1½ ft. May-June. Stock limited	.50	• • • •	
grandiflorus. Pale lavender trumpets held out above the delicate blue green leaves. 1½-2 ft. July. Stock limited	.50		
murrayanus. Long, tubular flowers of a soft wine red. 8-10 in.  May-June	.40	1.20	3.50
ovatus. Another choice variety with egg-shaped leaves and spikes of numerous flowers, ranging from pale blue to a light violet pink. 1½-2 ft. May-June. Stock limited			
<b>pubescens.</b> Strong spikes of white snapdragonlike flowers. A good native and looks well with other flowers. The most robust of all the Pentstemons. 3-4 ft. June-July	.30	.75	2.00
Red Purple. A rich carmine purple. Of compact, bushy growth, feathery foliage and long blooming period. 3 ft. July-September			3.00
PERILLA. Any soil in shade, semi-shade, or sun ocymoides crispa (Syn. nankinensis). Rich, frilled, red bronze foli-			
age. Interesting as a ground cover under trees where grass will not grow, and for combining with Autumn berries	.20	.40	1.00
PETASITES. Rich moist soil.  japonica. Early in March tight little bouquets of an unripe lemon			
color appear close to the ground, and are later followed by bold regiments of great, juicy green umbrellas. By Midsummer some of the leaves will measure 3 ft. across. Should be planted by ponds and streams where they soon naturalize			
PHALARIS. Moist soil in sun.	.00		• • • •
arundinacea variegata. Gardeners Garter. An ornamental, low growing, variegated grass. 18 in	.30	.75	2.00

PHLOMIS. Ordinary soil in sun.		Each	3	10
samia. A plant rare in cultivation, reaching 2 to 3 ft. in heig Felted, gray green leaves and double tiered cockades of cream buff. June-July	and		\$1.00	\$3.00
tuberosa. Whorls of shrimp pink flowers on tall, square stems. plants make a stiff handsome growth reaching a height of from 6 ft. June-July	to to		.85	2.50
PHLOX. Rich soil in sun.				
*divaricata. Wild Blue Phlox. The flat heads of large, fragrant : luminous, periwinkle blue flowers are borne on slender, erect ste Beautiful with yellow tulips. Does best in semi-shade. 1 ft. M	ms. ay-		0.5	0.50
June	• • •	.35	.85	2.50
*divaricata alba. A white form of the Wild Blue Phlox. Also does in semi-shade. Not as robust as the preceding			.85	2.50
paniculata (Syn. decussata) Antonin Mercie. A soft bluish le that contrasts well with the brilliant pinks. 2-3 ft. July-Augus		.25	.60	1.50
p. Beacon. A brilliant cherry red. A fine color. 2-3 ft. July-Augu	ust.	.25	.60	1.50
p. Elizabeth Campbell. Lovely, pale salmon pink, with light shadings and a deep red eye. 2-3 ft. July-August			.60	1.50
p. Firebrand. A fiery vermilion rose, deepening towards the cen 2-3 ft. July-August		.25	.60	1.50
p. George Stipp. Brilliant salmon rose with a deep crimson e 2-3 ft. July-August			.85	2.50

Hardy Phlox. Miss Lingard. (See page 30).

PHLOX SUBULATA ALBA. (See page 30).

PHLOX—Continued p. Jeanne d'Arc. A good and late pure white. 2-3 ft p. Jules Sandeau. A large, pure pink of a very delicate shade. 2-3 ft.			
July-August  p. Miss Lingard. Large, white panicles of flowers. Starts early and	.25	.60	1.50
blooms late. 2-3 ft. June-September	.25	.60	1.50
p. Rheinlander. Very large flowers of a clear light salmon, set off by a darker eye. 2-3 ft. July-August	.25	.60	1.50
<b>p. R. P. Struthers.</b> Bright rosy carmine with a claret red eve. 2-3 ft. July-August	.25	.60	1.50
<b>p. Thor.</b> Glowing, deep salmon pink with a white halo surrounding the dark carmine eye. 2-3 ft. July-August		.85	2.50
*stellaria. Mauve Phlox. Handsome, pale lavender flowers. A tufted or creeping variety adapted to edging and rock work. 5-6 in. April-May	.40	1.00	3.00
*stolonifera. A creeping Phlox of soft rosy lilac. Will stand light shade. 4-6 in. May-June	.35	.85	2.50
*subulata alba. A creeping Phlox making bristly mats of dark, almost evergreen foliage and pure white flowers. For the rockery. 6 in. May		.75	2.00
*s. atropurpurea. A brilliant lavender pink variety of the above. 6 in. May		.75	2.00
*s. G. F. Wilson. A pale wisteria blue variety. One of the most beautiful native plants. Forms large mats of exquisite color and should be in every rock garden. 6 in. May		.75	2.00
*s. The Bride. A white variety with a deep carmine center. 6 in. May.	.30	.75	2.00
*s. Vivid. The finest creeping Phlox. Flowers of a clear, deep apple-blossom pink with no hint of magenta—a great improvement over earlier varieties. 6 in. May		1.00	3.00
PHYSALIS. Ordinary soil in sun.  francheti. Chinese Lantern Plant. Lanternlike pods of a Chinese lacquer red. Splendid for Winter decoration. 2 ft	.25	.65	1.50
PHYSOSTEGIA. Rich, moist soil and full sun.			
grandiflora, Vivid. Snapdragonlike spikes of a rich, deep translucent pink. Very free blooming and late. 10 in. August to frost	.40	1.00	3.00
virginiana. False-dragonhead. Snapdragonlike flowers of a pale translucent rose, closely set along the spikes. 3 ft. June-July	.35	.85	2.50
v. alba. White False-dragonhead. A beautiful, white flowered form of the preceding		.85	2.50
PLATYCODON. Ordinary soil in sun.			
autumnale. Fine, free flowering perennial with large, violet blue, bell shaped flowers on 3 ft. stalks. June-July		.85	2.50
grandiflorum caeruleum. A large, very fine, blue purple variety.  Comes at a time when there is a dearth of bloom. 2 ft. July	.35	.85	2.50
*mariesi. A dwarf variety with gentian violet flowers. Good for the front of the border or for the rockery. 1 ft. July-August	.35	.85	2.50

PRIMULA POLYANTHA. ENGLISH PRIMROSE. (See page 32).

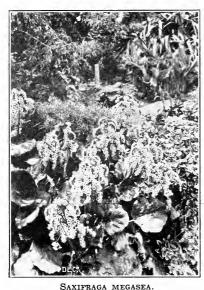

PLUMBAGO. Rich soil in sun or light shade.	Each	3	10
*larpentae. Low growing and late blooming—a pure indigo blue.  The best late blue rock plant. 1 ft. August-September		\$0.85	\$2.50
POLEMONIUM. Light shade in rich soil.			
*reptans. Jacobs-ladder. Lacelike foliage and arching stalks hung with bells of horizon blue. 8-10 in. April-Junerichardsoni. A little taller than the preceding. 15-18 in. May-June.	.35		2.50 3.00
POLYGONUM. Any soil and sun.			
sachalinense. Frothy tassels of white bloom in August and September. In the Winter the stiff, heart-shaped, cinnamon colored leaves make a striking note. Must be kept in bounds or it is apt to rush through a border. 4-5 ft	; 1	.60	1.50
POTENTILLA. Ordinary soil in sun.			
<b>nepalensis, Miss Willmott.</b> A robust, rather prostrate plant with a profusion of brilliant, salmon pink flowers during June and July			
12 in	.65	1.50	4.50
*tridentata. Wineleaf Cinquefoil. Forms mats of evergreen foliage starred with small white flowers. 8 in. June-August		1.20	3.50
*verna nana. Considered by many to be the finest of the Cinquefoils Low, tufty foliage with numerous brilliant vellow flowers in May and			
June. 3 in		.85	2.50

	Each	3	10
japonica. Japanese Primrose. Whorls of white, pink and rose colored flowers that open, tier after tier, up the 18 in. stalk. June	80. <b>65</b>	\$1.50	\$4.50
*polyantha. English Primrose. Rosettes of pale green leaves from which rise clusters of scalloped stars ranging through white, yellows, pinks, copper, purples and blues. One of the earliest flowers to bloom.			
10 in. April-May	.40	1.00	3.00
PULMONARIA. Rich soil in shade.			
*angustifolia (Syn. azurea). Clusters of deep, gentian blue flowers,			
similar to mertensias, but smaller and large, hairy, deep green leaves. Fine for the rock garden. 15 in. March-June	.65	1.50	4.50
*saccharata picta. The flowers of this variety are of a paler blue.			
The attractive foliage is splashed with white and is delightful during the Summer. 1 ft	.65	1.50	4.50
PYRETHRUM. Rich soil in sun.			
hybridum. Painted Daisies. White to deep pink Daisies on long			
stems. Lovely with irises. 1-2 ft. June	.35	.85	<b>2.5</b> 0
h. roseum. Gorgeous, deep pink shades. The ferny foliage enhances			
their beauty. Fine for cutting and effective in broad masses in the Spring border. 1½ ft. June	.35	.85	2.50

SAPONARIA OFFICINALIS. BOUNCING-BET. (See page 33).

ROSEMARINUS. Rich soil in sun.	Each	3	10
officinalis. Rosemary. A fragrant herb with old-rose colored flowers in late Summer. 1 ft. July-August	\$0 <b>.</b> 35	\$0.85	\$2.50
RUDBECKIA. Rich soil in sun.			
laciniata. Goldenglow. A brilliant and stately plant of the easiest cultivation in any garden. Profusion of yellow flowers in July and August. 5-6 ft	1	.75	2.00
maxima. Bright yellow flowers with a tall brown cone in the center which rise on 4 ft. stems out of rosettes of glaucous green leaves July	.40	1.00	3.00
<b>newmanni.</b> Black-eyed-Susan. Brilliant, orange yellow petals surrounding a smooth, black cone. Beautiful in late Summer and easy to grow. 2-3 ft	7	.85	2.50
<b>purpurea</b> (Syn. <b>Echinacea purpurea</b> ). <i>Purple Coneflower</i> . Bristling bronze cones encircled by lilac pink petals. 4-5 ft. July-August	.35	.85	2.50
<b>RUTA.</b> Ordinary soil in sun. <b>graveolens.</b> The old-fashioned <i>Rue</i> . An herb with aromatic, finely cut foliage for use in flavoring or for cutting to combine with flowers	.30	.75	2.00
SALVIA. Rich soil in sun.			
<b>azurea</b> . Clear, sky blue flowers on gracefully bending 4 ft. stems unequaled for a fine late blue effect in the border. August  officinalis. The herb Sage. Lavender flowers and aromatic leaves	.35	.85	2.50
used in seasoning. An ornamental garden plant as well. 3-4 ft	30	.75	2.00
pitcheri. A little later variety than S. azurea, not so tall and of a real sapphire blue. 3-4 ft. August-September	.40	1.00	3.00
pratensis. Loose spikes of deep, purple blue flowers in June. 2 ft	.30	.75	2.00
<b>turkestanica.</b> Tall stalks of silvery lavender flowers and large, hairy leaves. Fine for the back of the border. 4-5 ft. June	.40	1.00	3.00
virgata nemorosa. Spikes of rich, Tyrian purple flowers with reddish bracts that remain beautiful after the flowers are done. In a mass this is one of the most beautiful and showy plants in the garden. 3-4 ft July-August		1.20	3.50
SANTOLINA. Ordinary soil in sun.			
*chamaecyparissus. Lavender Cotton. Sea gray tufts of fernlike foliage. Beautiful as a rock or border plant. 1½-2 ft	35	.85	2.50
SAPONARIA. Well drained soil in sun.			
*ocymoides. Rock Soapwort. A half trailing plant with profuse clusters of little, scalloped flowers of a true pink. 6 in. May-August	.35	.85	2.50
*officinalis. Bouncing-Bet. Loose puffs of pink and white flowers that naturalize very easily. Fine for the wild garden. Spreads very rapidly. 6 in. June-July	,	.75	2.00
<b>SATUREIA.</b> Ordinary soil and sun or semi-shade.			
*alpina (Syn. Calamintha alpina). Blue gray, woolly leaves and small pink flowers. 8-12 in. June-July		.85	2.50

	AXIFRAGA. Rich soil in Each sun or semi-shade.  Smegasea. Large, bronze green leaves with compact stalks of begonia pink flowers in April. Fine for mass effect in the rock garden or border. 1 ft\$0.5 peltata. Tall, frilled, green cups that hold the rain		10
Se	water, and early in May foot-high stalks that overflow with lavender-andpink stars. Needs sun and moist soil, preferably the waterside	0	
DEC.	cutting. 1½ ft. June- September	5 \$0.8	\$2.50
SAXIFRAGA MEGASEA. bloom from July till frost. 1-2 ft	sulphur yellow flowers in	0 .73	5 2.00
SCUTELLARIA. Ordinary soil in sun.			
baicalensis coelestina. A semi-trailing deep violet blue that blooms profusely in		0 1.00	3.00

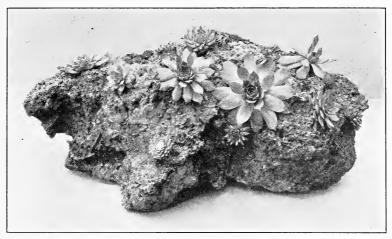

## Sedum

Satisfactory plants for use in rock gardens or borders. The succulent foliage of all and the brilliant flowers of some, make them excellent subjects for dry, sunny soil where but little else will thrive.

SEDUM	Each	3	10
*acre. Forms a low, dense mat of mosslike foliage which in June is			
covered with starlike yellow flowers	\$0.30	\$0.75	\$2.00
*album. Succulent leaves of dark green, assuming red and bronze			
tints in the Fall. White flowers in July		.75	2.00
*anacampseros. Clusters of glaucous gray, circular leaves at the			
terminals of branching stems	.30	.75	2.00
*arboreum. A larger S. reflexum with attractive blue green foliage.			
Distinct and interesting	.30	.75	2.00
*divergens. A native of our Northwest, with reddish stems, and			
bronze foliage which resembles beads strung along the stems. Yel-			2.00
low flowers in July	.30	.75	2.00
*ewersi. Akin to S. anacampseros. Has round, glaucous leaves along			
the prostrate stems. Flowers rose color	.30	.75	2.00
fabaria. An interesting form of S. telephium with narrower leaves			
than the type, and which show white variegations in some soils.			
12-18 in	.30	.75	2.00

*ibericum. Another variant of the S. stoloniferum section. The medium sized leaves turn very red in Winter	Each 0.30 .65 .40 .40 .40	\$0.75	10 \$2.00 4.50 3.00 3.00
medium sized leaves turn very red in Winter	.65 .40 .40	1.50 1.00 1.00	4.50 3.00 3.00
*kamtschaticum. An Asiatic form with rather large basal leaves, diminishing in size towards the terminals of the branches. Yellow flowers in July.  *lydium. A tufty, compact, low spreader with light emerald foliage during early Summer. Later in the season the foliage assumes the most brilliant coppery shades. Charming. 3 in*muralis. Dense mats of deep green foliage which turns bronze red in Fall	.40 .40 .40	1.00	3.00
diminishing in size towards the terminals of the branches. Yellow flowers in July.  *lydium. A tufty, compact, low spreader with light emerald foliage during early Summer. Later in the season the foliage assumes the most brilliant coppery shades. Charming. 3 in	.40	1.00	3,00
during early Summer. Later in the season the foliage assumes the most brilliant coppery shades. Charming. 3 in	.40		
in Fall		1.00	2 00
flushed with an opalescent pink and the flowers are a soft creamy	40		5.00
rose. New and beautiful. 1 ft. July-August	UF.	1.00	3.00
*pulchellum. A native Sedum which many authorities rank among the best of this vast family. Cypresslike green foliage and flowers like pink starfish. Best in cool, moist soil	.30	.75	2.00
purpurescens. Smoky purple leaves and creamy coral flowers. 1 ft. August	.40	1.00	3.00
*reflexum. A low, rapidly growing spreader with fine, blue green foliage resembling a club moss. The foliage assumes lovely tints in Autumn	.30	.75	2.00
*r. cristatum. While similar to the foregoing, the foliage forms broad cockscomb crests. Very interesting. Rare	.40	1.20	3.50
*rupestre minor (Syn. Pruniatum fosterianum). One of the finest of the S. reflexum type, with gray purple foliage which assumes lovely, rosy purple tints in the Fall. Yellow flowers	.30	.75	2.00
*sarmentosum. Very spreading mats of succulent, light green foliage and myriads of yellow, starlike flowers in June	.30	.75	2.00
*sexangulare. Akin to, yet distinct from S. acre. Forms compact masses of geometrical foliage with bright yellow flowers. 4 in. July	.30	.75	2.00
*sieboldi. One of the gems of the race. In October the round, blue gray leaves are rimmed with the same flamingo pink as the clusters of flower heads	.65	1.50	4.50
*Species Maine. A species found growing in Maine which resembles a choice variety of S. rupestre but is of larger growth. The foliage is glaucous but assumes lovely Fall coloring	.30	.75	2.00
<b>spectabile, Brilliant.</b> A splendid border species with flat corymbs of rich carmine flowers in September. Glaucous green foliage. 18 in.	.35	.85	2.50
*stoloniferum. Fine foliage which assumes beautiful Autumn colorings	.30	.75	2.00
*Unnamed Species No. 1. This is an interesting Sedum which arrived at our nurseries via the "friendship route," without name. It is a creeping sort, with large leaves and white flowers. July	.30	.75	2.00
*Unnamed Species No. 2. Another type similar to the above but with fine yellow flowers. July	.30	.75	2.00

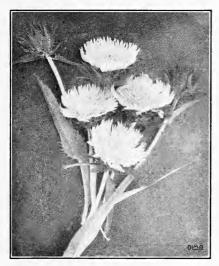

SEMPERVIVUM. Houseleek	. Well drained soil in sun.  Cobweb Houseleek. Small rosettes of succu-	Each	3	10

SEMPERVINUMS IN VARIETY. (See page 36).

STACHYS. Ordinary soil in sun.	Each	3	10
grandiflora superba. Shrimp pink bottle brushes on stiff stalks 12-18 in. June-July		\$0.85	\$2.50
*lanata. Lamb's Tongue. A very useful plant for edging, because of its dense, gray, woolly foliage, which is particularly effective in showing off the small, watermelon pink flowers. 1 ft. July	l	.85	2.50
STATICE. Ordinary soil in sun.			
latifolia (Syn. Limonium latifolium). An effective border plant with foamy masses of minute lavender flowers which may be dried and used for Winter decoration. 1-2 ft. July		.85	2.50
STOKESIA. Rich, cool soil in sun.			
cyanea. Flowers of an exquisite, light violet blue, like large China asters. Low growing and drought resistant. One of the most beautiful late flowers in the garden. 1 ft. August until frost		.85	2.50
TANECETUM. Ordinary soil in sun.			
vulgare. Old-fashioned Tansy. Finely cut, aromatic leaves and masses of buttonlike yellow flowers. 3-4 ft. July-August		.65	1.50
TARRAGON. Light soil, full sun and some shelter.			
(Syn. Artemisia dracunculus). Should be in every herb garden. Leaves delicious either as a seasoning or as a flavoring for vinegar. 2-3 ft		.85	2.50

canadense. Small leaves of a rich green with little lavender pink	Each	3	100
flowers. The bushy little plants stay green all Winter. Excellent for massing in front of shrubs. 1 ft	0.40	\$1.00	\$3.00
THALICTRUM. Moist, leafmold soil and semi-shade.			
adiantifolium. Rue. Foliage like a maidenhair fern. Lovely for mixing with cut flowers, or for naturalizing in woodlands. 2-3 ft	.40	1.00	3.00
<b>atropurpureum.</b> Tall Pink Rue. One of the most beautiful perennials. Airy balls of lilac pink fluff on 3 to 4 ft. stems. June	.40	1.00	3.00
dipterocarpum. Clusters of dainty, lilac mauve flowers with lemon yellow anthers. 18-24 in. July-August	.30	.75	2.00
flavum. Citron yellow flowers lovely against the glaucous, columbine-like leaves. 4-5 ft. June-July	.40	1.00	3.00
orientale. An ivory white variety. The same height and season as T. atropurpureum, and beautiful with it	.50	1.20	3.50
<b>polygonum.</b> Wild, native <i>Meadowrue</i> . A magnificent plant. The great foamy panicles of cream-colored flowers are very beautiful in August. Needs rich, moist soil. 6-7 ft	.40	1.00	3.00
THEDMODSIS Ordinary soil in sun			
<b>THERMOPSIS.</b> Ordinary soil in sun. <b>caroliniana.</b> One of our handsomest native plants. Spikes like pure lemon yellow lupines. 5-6 ft. End of June	.40	1.00	3.00
THYMUS. Ordinary soil in sun or semi-shade.			
*serpyllum citriodorus. Lemon-scented Thyme. Mats of fragrant foliage with myriads of small, reddish pink flowers. Every rock garden should have this. 9-12 in	.30	.75	2.00
*s. coccineus. Crimson Thyme. A pretty, low creeper with crimson flowers and bronzy foliage. Fine carpeter. 4 in	.30	.75	2.00
*s. lanuginosus. Woolly Thyme. Downy, gray foliage almost like gray moss. One of the finest for carpeting or for planting between stepping stones	.30	.75	2.00
vulgaris. The old-fashioned herb <i>Thyme</i> . Aromatic foliage, fine for	.00		2.00
flavoring	.30	.75	2.00
TIARELLA. Leafmold soil and semi-shade.			
cordifolia. Foamflower. A beautiful ground cover under trees or in the woods. In early Spring it is covered with little spires of fuzzy, white bloom. 8-10 in	.30	.75	2.00
TDADESCANTIA Ordinary soil in our or somi shad-			
<b>TRADESCANTIA.</b> Ordinary soil in sun or semi-shade. <b>virginiana.</b> Three-petaled, rich, purple flowers that naturalize easily and make a spot of strong and brilliant color in the wild garden.			
1-3 ft. June-July	.30	.75	2.00
v. alba. A lovely white variety of the above	.35	.85	2.50
v. Bartram. Originally from Bartram's Gardens. Tall, upright growing with lavender flowers that remain open all day. The finest Tradescantia. 2-3 ft. July-August	.50	1.20	3.50

TRITOMA. TORCHLILY.

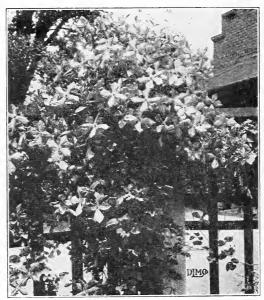

<b>TRITOMA.</b> Rich soil in sun.	Each	3	10
hybrids. Torchlilies. Great blazing rockets of sulphur and fiery orange begin to bloom in June and continue until October. A good splash of hot color in a border. 3-4 ft	60.40	\$1.00	\$3.00
TUNICA. Ordinary soil in sun.			
*saxifraga. Resembles a delicate, pink gypsophila. Fine, hairlike foliage forming large, green mats above which small flowers float like a pink mist. One of the best rock plants. 12 in. July	.35	.85	2.50
VALERIANA. Ordinary soil in sun.			
officinalis. Garden Heliotrope. Tall stalks of Heliotrope scented flowers. 3-4 ft. July-August	.35	.85	2.50
o. alba. Panicles of soft white flowers and glossy, green leaves. A continuous bloomer. Splendid for cutting. 2-3 ft. July-September.	.35	.85	2,50
o. coccinea. A beautiful, rose coral form of the foregoing. A very rare shade among flowers and one that always commands attention.  2-3 ft. July-September	.35	.85	2.50
o. rubra. See Centranthus ruber.			
VERBENA. Light soil and full sun.			
canadensis. A trailing plant covered with typical Verbena flowers of a pure lavender. Blooms all Summer and likes to scramble down over a hot, dry bank. 12-18 in	.50	1.20	3.50

	Each	3	10
*allioni. The smallest, earliest and bluest of all the Veronicas. 4 in. Early May	30 <b>.40</b>	\$1.00	\$3.00
incana. The smallest of the herbaceous Veronicas. Gray foliage and slender spikes of light, violet blue flowers from June to August. 8-10 in	.40	1.00	3.00
winkle blue on stiff stems, 2-3 ft. August-September	.40	1.00	3.00
*rupestris. A spreading mat. Fine foliage which, in May and June, is covered by a sheet of indigo blue, relieved and lightened by flecks of pale rose. 6 in	.30	.75	2.00
*r. alba. A beautiful white form which contrasts well with the deep blue of V. rupestris. Blooms at the same time	.30	.75	2.00
*r. Heavenly Blue. A tailer type than the preceding but equally covered with deep, sky blue flowers	.30	.75	2.00
*r. Pale Blue. A delightful, light blue form of the above. Very delicate coloring. Blooms in May, often with scattered blossoms in the Fall.	.30	.75	2.00
*r. rosea. The clear, light pink flowered counterpart of V. r. Pale Blue. The two grown together make a charming effect	.30	.75	2.00
*r. Royal Blue. Two weeks later in blooming than V. r. Heavenly Blue and several shades deeper in color	.30	.75	2.00
spicata rosea. A handsome Speedwell with spikes of soft rose flowers on 12 in. stems. One of the best border varieties. June-July	.40	1.00	3.00
subsessilis (Syn. longifolia). Long, nodding spikes of amethyst blue. A brilliant flower. Fine for cutting. 1-1½ ft. July-August	.40	1.00	3.00
VINCA. Cool soil and shade or semi-shade.			
*alpina. A rare and unusual variety with velvety flowers of a true Tyrian purple. June-July	.40	1.00	3.00
*minor. A trailing, evergreen ground cover popularly known as Periwinkle or Ground Myrtle. Deep green leaves and pretty, violet blue flowers in May	.25	.65	1.50
Lovely in combination with either of the foregoing varieties	.40	1.00	3.00
VIOLA. Leafmold soil and semi-shade. *alba. Pure white Violet. Lovely	.30	.75	2.00
*blanda. A delightful native Violet with creamy white flowers. Fine under trees. April-May	.30	.75	2.00
*cornuta alba. An extra large, milk white Violet which is both beautiful and showy	.30	.75	2.00
*c. Black Knight. The only really black flower	.30	.75	2.00
*c. Blue Gem. A lovely, violet blue form	.30	.75	2.00
*c. G. Wermig. Large flowers of a clear butter yellow	.30	.75	2.00
*c. Mauve Queen. A pure, light lilac	.30	.75	2.00
*c. Purple Robe. Deep, rich purple	.30	.75	2.00
*odorata. Old-fashioned, fragrant, purple Violet	.30	.75	2.00
*o. alba. A fine white form of the preceding. Blooms early and profusely	.30	.75	2.00

YUCCA FILAMENTOSA.

VIOLA—Continued			
*papilionacea. The Confederate Violet. White flowers, flushed and I veined with blue, in large, spreading clumps. Lovely in moist ground			10
in front of ferns. 10 in. June\$6	0.35	<b>\$0.</b> 85	<b>\$2.50</b>
*pedata bicolor. A most beautiful Violet. The two upper petals, rich velvety purple; the lower ones, a pale violet blue. Flowers large and leaves very finely cut. Likes acid soil, sun and sand. June	50	1.20	2 50
	.00	1.20	0.00
*pubescens. Wild, yellow Violet. Fine for the wild garden. The blossoms are branching up the stalk. 10 in. May	.30	.75	2.00
*tricolor. The old-fashioned Johnny-jump-up. Small, pansylike flowers that bloom profusely, even on mild days in the Winter. A rampant spreader but, if kept in bounds, very lovely in the rock garden or growing in the chinks beside stone steps. Flowers yellow, bronze, blue and mostly deep, velvety purple. 6-8 in	.25	.65	1.50
YUCCA. Ordinary soil in sun or shade.			
<b>filamentosa.</b> Clumps of bristling, evergreen foliage and tall spikes of creamy, bell shaped flowers. Beautiful by themselves, or planted at the foot of cedars, or combined with orange asclepias and cactus. One of our firest American plants. 4-6 ft. Tune	.40	1.00	3.00

CLEMATIS JACKMANI. (See page 44).

## HARDY SHRUBS AND VINES

Each 3 10 **ABELIA.** Sheltered spot in sun and rich soil. grandiflora. Bush Arbutus. The graceful, arching stems are clothed with dark, glossy, nearly persistent leaves and end in clusters of tubular, translucent pink flowers that are borne from Midsummer to frost. Winter protection recommended......\$0.65 \$1.50 \$4.50 **ALBIZZIA.** Rich light soil in sun, and shelter from north and east winds. julibrissin. Mimosa. A low headed, wide spreading tree with very feathery foliage and fluffy pink balls of flowers hanging below the leaves. The leaves close at night. 20-30 ft. Prices on application. **AMPELOPSIS.** Rich deep soil in sun or semi-shade. heterophylla. Berries of turquoise, purple and jade in the late Au-ARUNDO. Sun and moisture. donax. The Giant Reed of southern France, a very striking and tropical 

<b>BAMBUSA.</b> Rich, moist soil in sun or semi-shade, and shelter from the northeast winds.	Each	3	10
metake. Tropical foliage plant attaining a height of 15 to 20 ft. Splendid for edging lily pools or water gardens			
palmata. A rare species of Bamboo which is excellent for waterside planting. Low growing and with the broadest leaves of any Bamboo. Particularly beautiful in November and December. 1½-2½ ft. Stock limited	5.00		
pygmaea. A rare, dwarf Bamboo. Excellent as a ground cover under rhododendrons or trees. Stands shade well and increases slowly. 6 in. Evergreen	1.50		.,
veitchi. Another very choice Bamboo. Similar to B. palmata, but somewhat taller in growth and with very broad leaves. 4-5 ft. Practically evergreen	5.00		
BERBERIS. Sun and ordinary soil.			
*verruculosa. A beautiful, compact, low growing and evergreen Barberry. Ideal for the rock garden. The foliage remains fresh and glossy all Winter. 12-18 in	2.50		
<b>BIGNONIA.</b> Ordinary soil and sun. <b>grandiflora.</b> The most beautiful hardy Trumpet Vine. Loose sprays of great, wide-mouthed, tubular flowers of a lovely salmon orange. Can be grown as a vine or trimmed into a standard. August-September			
BUDDLEIA. Rich soit in sun.			
nahonensis. Butterflybush. Low growing and compact. The foliage gives an almost feathery effect and the profuse flower sprays are of a deep lavender. Excellent for restricted space in a small garden. 2-3 ft. July-October			
variabilis magnifica. Grows 6 to 8 ft. in a season and from Mid- summer on is covered with long sprays of fragrant lavender flowers.		\$1.50	\$4.50
CALLINA Destructional services des			
CALLUNA. Peaty soil and semi-shade. vulgaris. Heather. A low, bushy shrub with tiny clustered leaves and slender, erect spikes of small pink flowers. 8-10 in. Late Summer. (Also see Erica)		1.50	4.50
CARYOPTERIS (BLUE SPIRAEA). Rich soil, best in sheltered, sunny spot.			
mastacanthus. A handsome, low shrub. Grows about 3 ft. high and produces rich, lavender blue flowers in great profusion the whole length of the branches. A valuable plant, blooming continuously from early in September until cut by frost		1.50	4.50
CELASTRUS. Ordinary soil in sun.			
scandens. American Bittersweet. A native climber with glossy leaves that turn bright yellow in Autumn and clusters of orange and crimson fruit that hang on the vine all Winter or may be cut and used fo Winter bouquets. A beautiful and rapid growing vine	r	1.00	3.00

CITRUS. Good garden soil.  trifoliata. Hardy Orange. A handsome bush or impenetrable hedge plant. White flowers in Spring followed by small, bitter oranges in the Autumn. The thorny, green branches give an evergreen effect in Winter. Stands shearing well. 2-3 ft			10
CLEMATIS. Moist but well drained soil; sunny, sheltered spot.  graveolens. A slender vine. Flowers with four-pointed petals of a soft citron yellow in July and August. In the Autumn the fluffy seed pods are equally decorative	1.00		
whorls of hyacinthlike, sweetly scented, pale blue flowers. Leaves larger than those of any other variety. 3 ft. August-September  jackmani. The sturdiest of the large flowered Clematis. Large, open flowers of the richest purple velvet. Lovely trailing in front of Japanese iris. June-September	.40		
*horizontalis. A low shrub with almost horizontal branches. Native of China. Leaves dark green and about ½ in. long; flowers pinkirh white; fruit bright red. Attractive in rockeries. A most desirable ground cover and should be largely planted		4.00	
CYDONIA. Rich soil in sun.  japonica. Flowering Quince. A well known and brilliant shrub that blooms with the forsythia. Flowers dazzling scarlet, followed in Autumn by fragrant, yellow quinces. Can be sheared into a hedge or grown as a specimen. 4-6 ft. April		1.50	
CYTISUS. We take great pleasure in offering herewith what we confidently believe to be the most complete selection of Cytisus (Brooms) ever offered in this country. All of these do best in a sheltered, sunny location in well drained soil. Until well established they will be benefited by Winter protection. Stock limited.			
capitatus. A tall shrub with deep green foliage and terminal clusters of pale yellow, pea shaped flowers. Summer			
Hybrid, May Fly. A charming, free flowering shrub reaching 4 to 5 ft. in height. Scarlet and yellow flowers in early Summer	1.00		
of soft yellow flowers in Summer. 2-3 ft	1.00		
threes and golden yellow flowers in May. Valuable for sandy soil and seashore planting. The green stems give it a cheerful and evergreen effect in Winter. 4-6 ft	.65	1.50	4.50
<b>DAPHNE.</b> Peaty soil overlying limestone rock. Good drainage and sun. *cneorum. A difficult plant to grow but one whose beauty repays the effort. The low, spreading stems of feathery, evergreen foliage end in flat clusters of pure pink, star shaped flowers. Resents moving, and when undisturbed in a congenial location, gives masses of bloom in June whose fragrance perfumes the whole gar len. Undoubtedly one of the finest though more difficult Alpines. 1 ft			

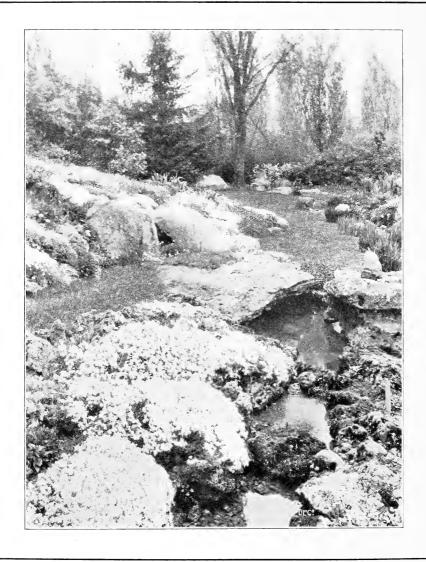

GENISTA GERMANICA.

ERICA. Peaty soil and semi-shade.	Each	3	10
*carnea (herbacea). Heath. Grows about 6 in. high. Nodding, deep pink, bell shaped flowers up the fuzzy, dark green stems. At its best in a sheltered nook in the rock garden. March		\$1.50	\$4.50
<b>EUONYMUS.</b> Ordinary soil and sun or semi-shade.			
japonicus. A very useful and decorative evergreen shrub, with large, round, glossy, shining leaves. Thrives well near the seashore. The foliage is very effective in Winter. 5-6 ft			
radicans. Wintercreeper or Evergreen Bittersweet. Rich green foliage and clusters of orange berries. Hardy where English ivy is not. Beautiful either as a ground cover or to grow up walls		1.50	4.50
*r. minimus kewensis. The smallest Euonymus. Will trail over rocks or up the trunks of tress. A beautiful miniature creeper where a vine of a small scale is needed. Stands shade. Slow growing		1.50	4.50
FORSYTHIA. Ordinary soil in sun.			
suspensa fortunei. Golden Bell. The branches are covered in April with masses of glowing, yellow flowers. One of the most brilliant and beautiful of our Spring flowering shrubs. 6-8 ft	.65	1.50	4.50
GENISTA. Well drained soil in sun.			
<b>germanica.</b> A useful and very pretty shrub with arching sprays of yellow flowers in Midsummer. 2-3 ft	1.00		

GORDONIA. Rich soil in sun.  pubescens. An extremely rare and beautiful native shrub that blooms freely from the end of August to frost. The large, cup shaped, fragrant, white flowers, with their clusters of brilliant orange stamens, are set above whorls of long, glossy, green leaves that turn, in Autumn, to brilliant shades of wine and crimson, while the flowers are still blooming. Our rarest and finest shrub. Prices on application.		3	10
HEDERA. Moist soil in shade.  helix. English Ivy. Beautiful as a ground cover or on buildings	\$0.35	\$0.85	\$2.50
**HYPERICUM.** Ordinary soil in sun and a little shelter.  **aureum.** A dwarf variety. Numerous bright yellow blossoms in July and August. Fine subject for Alpine garden. 12-18 in  **moserianum.** Gold Flower.** Beautiful, golden yellow flowers with crimson stamens. Dwarf habit. Makes a fine show in August and September. Strictly speaking this is a perennial plant, but it is so shrublike that we are listing it as a shrub. Stock limited	.40	1.00	
ILEX. Rich cool soil and sun.  opaca. The familiar American Holly. Forms a small, slow growing tree. The spiny, green leaves and brilliant, red berries make it one of our most valuable evergreens for Winter effect. Can be used to form beautiful hedges as it stands trimming well and requires pruning only twice a year. Should be in every garden. 2-2½ ft	5.00		
JASMINUM. Sheltered spot in sun.  nudiflorum. Winter Jasmine. A charming vinelike shrub with sprays of soft yellow flowers in showers down the drooping stems before the leaves appear. If planted in a sheltered corner it will be blooming by the end of February.  stephenense. A fragrant, pale rose colored Jasmine that blooms in June. Quite hardy and spreading. Excellent for scrambling down over a rough bank in the sun.	.60	1.50	
KOLKWITZIA. Ordinary soil and sun.  amabilis. New and very beautiful shrub covered with showers or small, tubular, pale rose flowers in May. 18-24 in	f 2.50		
LIGUSTRUM. Sun and shelter.  delavayanum. A low growing Privet with minute glossy leaves  Excellent where a diminutive hedge is needed—a light and airy effect. 18-24 in	2.00		
LILAC. (See Syringa).			
MAGNOLIA. Rich moist soil in sun. glauca. Sweetbay. A small tree. The leaves, which hang on into the Winter, are glossy green on top and silvery underneath. Small creamy, fragrant flowers are borne throughout the Summer. 15-20 ft.	,		

MAHONIA. Light dry soil in full sun.	Each	3	10
aquifolium. Oregon Hollygrape. A handsome, evergreen shrub the is hardy in the North if planted in a sheltered position. Brom green, hollylike leaves and yellow flowers in May. 3-4 ft	ızv		
MIMOSA. (See Albizzia).			
NANDINA. Rich moist soil in sun and shelter.			
domestica. Slender bushes crowded with finely cut, evergreen folia whose stems turn a brilliant crimson in Autumn. The fluffy panic of white flowers are followed by sprays of large scarlet berries the remain well into the Winter. A beautiful and unusual plant to liven the garden in Winter. 3-4 ft	eles nat		
NEVIUSA. Rich soil in sun.			
alabamensis. A rare native. Long, curved sprays of feathery, crea colored flowers in May and June. 4-5 ft	am 2.50		
OXYDENDRON. Woods soil in sun.			
arboreum. A small, slender native tree whose flowers, like sprays lilies-of-the-valley appear in July. In Autumn the droopi crescent shaped leaves take on the most beautiful shades of glow pinks, apricots and rosy bronze. Lovely in a woods planti 15-20 ft	ng, ing ng.		
PACHYSANDRA. Rich soil in shade.			
<b>terminalis.</b> An invaluable, evergreen ground cover. Can be u where grass will not grow and makes beautiful mats of green unthe shade of trees, shrubbery or in rhododendron beds. 6-9 in	der		\$1.50
PICEA. Good garden soil.			
*glauca conica. Probably the finest of the diminutive evergre for the rock garden. A compact and perfect little Spruce tree form and of the slowest growth. Fine, symmetrical specimens. 18-24	in		
ROBINIA. Ordinary soil in sun.			
viscosa. Rose-acacid. A shrub or small tree with pendant, wister like flowers of soft rose pink. Most effective grown as a standabove blue iris. 8-10 ft. May-June	ard		
SYRINGA. Ordinary soil and sun.			
vulgaris. The old-fashioned, ever popular, purple Lilacs. N	lice 75	\$2.00	6.00
VITEX. Ordinary soil in sun.			
<b>agnus-castus.</b> Chaste-tree. Shrub with aromatic, grayish, star sha foliage. Flowers, spikes of soft violet from July to September. 3-4
